

1. COURSE

This seminar is dedicated to:

- Why knowledge of Cyber Security is critical
- Cyber Security evolving and increasing threats – both personal and professional – whilst working in a hybrid environment including future trends
- An understanding of how holistic Cyber Security can mitigate risks (people, policies, processes as well as technical) An overview of the relevant law, legal rights and responsibilities
- The importance of Information Assurance and Risk Management
- Best practice guidance – at work, remote working and personal top tips. • Further information and support.

2. COURSE CONTENT

The challenge for us all to safeguard against Cyber attacks and scams and prevent data breaches has increased sharply as remote working introduces greater Cyber exposures. It is essential for organisations and individuals to address these vulnerabilities by adopting best practices in the hybrid working environment. Cyber Security training is critical to support this. Templar Executives' NCSC Certified 'Cyber Security and Hybrid Working' course raises awareness of the bespoke threats associated with hybrid working, so individuals and organisations can protect themselves and work effectively in this 'new norm'.

3. COURSE FORMAT

Learners will engage in an interactive workshop which will allow them to develop theoretical knowledge and apply it to their own situations. Delivery will be through a blended approach that will allow learners to fully engage in the session and gain practical examples of how to turn theory into practice.

4. DETAILED COURSE PROGRAM (unrolled training sequences)

| Session | Delivery |
|---------|---|
| 1 | <i>Inroduction</i> |
| 2 | <i>Cyber Security and its Importance</i> A review of the key aspects of Cyber Security and why it is so critical within a business |
| 3 | <i>Personal and Professional Threats and vulnerabilities</i> |
| 4 | <i>Holistic Cyber Security and Best Practice Principles,</i> Looking at how to best manage the Cyber Security risks based on policy and processes best practice |
| 5 | <i>Cyber Security and the Law</i> Overview of the relevant laws, rights and responsibilities in relation to Cyber Security |
| 6 | <i>Risk Management</i> The importance of Information assurance and risk management |
| 7 | <i>Practical Examples and Implementation</i> Best practice guidance for Cyber Security at work and for remote working solutions |
| 8 | <i>Course Summary and Evaluation</i> |

5. COURSE PREPARATION

Learners should demonstrate a commitment to developing their awareness and understanding of Cyber Security in the workplace and when adopting hybrid working patterns.

6. COURSE EVALUATION

Participant engagement and contribution is essential in this course. It is expected that all learners fully interact with the learning and the group activities.
