This seminar is dedicated to:

- The definition of holistic Cyber Security and the key role of Managers
- Raising awareness of the types Cyber Security threats, vulnerabilities and risks – and discuss current and evolving trends (including industry context as appropriate);
- An overview of key legislation, and regulations in relation to your responsibilities; including consequences of breaches/non-compliance
- Exploring the risks of sharing information via social media and increased working from home
- Ensuring Cyber Security is an essential toolkit for business managers to optimise people and processes and to mitigate risks
- Discussing incident management and business continuity
- Exploring how to develop a positive Cyber Security culture
- Discussion, exercises and real-world scenarios.

2. COURSE CONTENT

As the Cyber Security landscape evolves and cyber-attacks continue to increase, it is essential to maintain awareness of the growing threats, risks and vulnerabilities and take mitigating actions. This is especially pertinent in the current environment and increase in hybrid working. Leaders play a critical role in organisations and as the Cyber Security landscape evolves, leaders need to continue to develop a greater awareness of Cyber risks and threats. Leadership is pivotal in driving and championing Cyber Security and Information Assurance and developing Cyber resilience for business enablement.

3. COURSE FORMAT

Learners will engage in an interactive workshop which will allow them to develop theoretical knowledge and apply it to their own situations. Delivery will be through a blended approach that will allow learners to fully engage in the session and gain practical examples of how to turn theory into practice.
